# 30 Days Lost in Space STEM Challenge

Students will work alone or in teams to learn and apply basic coding and circuit skills while developing solutions to this real-world problem.

## Getting Started

Teachers will register online to attend an orientation (held monthly) about the challenge and using the kits at the [STEM Resource Center](#)

01

02

## Gathering Materials

Teachers will be given a bag and can check out a classroom set of kits to use for 30 days. Recommended 1 kit per 2 students.

03

04

## Sharing Solutions

Teachers are encouraged to share their experiences by sending pictures and videos of their student's solutions/testimonials to [stem@maricopa.gov](mailto:stem@maricopa.gov).

## Launching the Challenge

The challenge includes 30 lessons broken down into 6 chapters that students can complete during the regular school day or before/after school. Each student/group will need a laptop or computer to program their HERO board with access to the internet.
