

# EARTH DAY

APRIL 22

## ART PROJECT

**Essential Question: How can we use recycled materials to create art that raises awareness about environmental issues and inspires positive change in our community?**

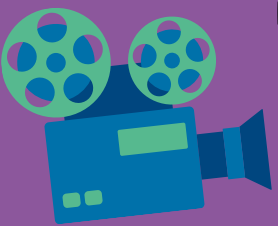

### COLLECT MATERIALS

- Various materials out of your (and your neighbor's) recycling bins
- Glue, tape, markers, scissors, poster board, cardboard, etc.

**CHALLENGE** students to create art using recycled materials. Provide a variety of recycled items like paper, cardboard, bottles, cans, and more, along with art supplies like glue, scissors, and paint. Let students' creativity flow as they make sculptures, collages, or paintings that highlight the beauty of nature or depict environmental messages. This activity not only promotes sustainability but also allows students to express their thoughts and feelings about Earth Day through art.
