

WHAT IS IT?

Leeann Lindsey, at Edvolve learning, has created a set of 6 posters (sized 8.5 x 11) designed to help teachers introduce the language of digital citizenship. She hopes that they can help you... help your students identify as digital citizens who make healthy and positive digital decisions.

IMPACT?

The use of technology, in and out of the classroom, has continued to grow as we look to prepare our students for an increasingly digital world. These tools help keep our students **Healthy and Safe** as they consider what it means to be personally and socially responsible digital learners.
