

## WHAT IS IT?

Through the use of Nearpod, and all of its features I have been able to create an environment of high engagement, rigorous material, and multiple formative assessment opportunities. Nearpod creates a report for each of my presentations, complete with statistics of participation in each activity.

## IMPACT?

It seems to keep students engaged in lessons. Our classes are 90 minutes long. That's a pretty long time to just sit and listen. I try to keep things moving with Nearpod activities at least every 15 minutes of instruction. This serves as a check in, engagement wise and learning wise!
